

Surfrider Foundation's Ocean Friendly Gardens Program *Go OFG and Join an OFG Group*

Santa Barbara, CA – 1,000 sq. ft.
lawn removed

With lawn = 30,000 gallons of
water/year & runoff

Putting in drip irrigation

Applying compost tea

Installing sheet mulching

Installing plants

Sponging up the rain

“After” = 80% water use reduction,
with 3,750 gallons of rainwater from roof feeding garden, no runoff & now
habitat. Cut the parkway curbs: runoff waters plants and soil filters pollutants.

Join the Surfrider OFG Group: Learn, and educate and help others.
